ABOUT US

A production company HITLINE is organized on the initiative of SPE TECHNOHOLOD, which has been successfully operating on the market for over 20 years.

The HITLINE Company aligned itself with production and export of commercial refrigeration equipment.

25
years
experience

800
employees

24000M²
sq. m of the
working area

45
export to
45 countries

200
international, national
and regional commercial
networks products

50000
projects equipped
with our products

PRODUCTION

The HITLINE Company is a closed production complex:

- The plant's metalworking machinery includes turret coordinate punching presses, laser and plasma metalcutting centers, as well as sheet metal bending machines, CNC milling and turning metalworking centers.
- Automated complex for powder coating
- Vacuum moulding shop and polyurethane foam filling shop
- Glass parts process is made at the site equipped with programmable machine tools.
- Laminated chipboard processing and MDF decor pieces production shop
- Final assembly of product is made in the new, modern shops

LASER METAL CUTTING SHOP

Within the framework of development programs and increasing production capacity, the processing equipment base updates with new pieces of equipment of leading brands.

TEST CLIMATIC CHAMBER

OUR ADVANTAGES

- High quality of the products made is guaranteed by the multistage monitoring system on all the trajectories of the production cycle and of the finished products testing
- So, since 2007 the Company has been certified to the International Quality Management System ISO 9001 (BUREAU VERITAS CERTIFICATION)
- The company's compliance with international standards is under control and confirmed every year during a supervision audit by international experts. All the HITLINE products are certified in the Ukrainian «UkrCEPRO» System and have an expert's appraisal for them from the Sanitary and Epidemiological Service of Ukraine. Our suppliers of component parts and materials are leaders in their industries
- Its own working area and machinery, advanced production technologies, direct deliveries of materials and components are significantly reducing the cost of the production.
- The wide network of representative offices, service centers (in Ukraine), as well as own motor pool ensure the sales of the products, provide their delivery, warranty and after sales customer services in any region of Ukraine.

OUR PHILOSOPHY OF CREATING OF RETAIL STORE EQUIPMENT

Energy saving

- two jet air curtain;
- energy efficient electric motors;
- led lights;
- evaporators having an increased surface area and reduced hydraulic resistance;
- energy-saving glass modules;
- evaporators defrosting without the use of tubular electric heating elements.

Service extended

- making the equipment's parts and details of galvanized steel;
- additional galvanizing of steel strength parts and welded seams;
- wear-resistant polymer and powder coating;
- trim elements made of anticorrosion steel;
- protective (vandal-proof) bumpers.

Ergonomics

- high observability of display area;
- the display unit's design providing a quite short (shorter than an outstretched arm) distance from the customer to product items;
- sliding glass modules;
- multilevel systems to divide a space in display units;
- a wide range of associated accessories.
